FRIANT

Task Seating Comparison

Zone Too
Zone Too was designed to provide a well-balanced workhorse of a chair that could accommodate a wide range of users. Being highly adaptable, this task chair fits varying body types, heights, and most importantly—work styles.

Vektor
Our goal was to deliver initial comfort without the need for adjustments. Vektor's unique height-adjustable 3D armrests, lumbar support, and breathable mesh back work together to contour to the individual's preference.

Ignite
Elevating the seating standards, Ignite delivers striking style and extreme functionality. Adjusting tension is effortless with a back tilt lock and tension adjuster. A chrome-plated detail expands the length of the center Y-column, while the lumbar support provides focus for the user.
