# Tango

## Style in Seating

Tango features both functionality and beauty. The appearance is simple and stylish with a unique curved suspended backrest, making it an eye-catcher that exudes modern style and design. The curvature of the elastic mesh backrest supports the sacrum steadily, allowing your spine to maintain a natural “S” shape, forming solid and comfortable support.

## Trusted Quality

## Integrated Ergonomics

Tango pairs excellent ergonomic performance and high durability. The backrest naturally fits the three ergonomic areas: the sacrum, thoracic spine, and scapula, while adapting to the micromotions of your body. When you sit down, your weight is distributed evenly on the chair, which helps to increase comfort, reduce stress, and improve concentration.

## Adjustments & Seat Slider

The newly developed under-mounted mechanism can achieve four locking positions to meet different tilting needs. Simple knob adjustments allow you to easily switch between work and rest mode.

Seat height adjustment

Back tilt tension adjustment

## Comfort & Support

The armrests are an important element of the chair. Tango armrests have a soft PU cover, which can be adjusted up and down, forward and backward, and left and right, easily providing the perfect support for your arms.

Up & Down

Forward & Backward

Left & Right

# Features and Functionality

---

## 3D Armrest

With up and down, forward and backward, left and right adjustments, it can easily provide perfect support for your arms
